Surat, Gujarat - 394210, India

OBJECTIVE

Data Scientist with hands-on experience in Machine Learning, Deep Learning, and Time-Series Forecasting. Built and deployed end-to-end ML systems using Python, TensorFlow, Spark, and AWS. Experienced in data preprocessing, feature engineering, model evaluation, and scalable deployment.

SKILLS

- **Programming & Databases:** Python, SQL, PostgreSQL, MySQL
- **Data Analysis & Visualization:** Pandas, NumPy, Matplotlib, Seaborn, Exploratory Data Analysis (EDA), Tableau
- **Machine Learning & Statistics:** Regression, Classification, Feature Engineering, Model Evaluation, Cross-Validation, Hyperparameter Tuning
- **Deep Learning & NLP:** TensorFlow, Keras, DNN, CNN, NLP, Text Preprocessing, Sentiment Analysis
- **Generative AI & LLMs:** Generative AI (GenAI), Large Language Models (LLMs), Prompt Engineering, LangChain, LangGraph, RAG
- **Deployment & Tools:** FastAPI, Docker, AWS, Git/GitHub, Jupyter Notebook

WORK EXPERIENCE

- **Petpooja**  May 2025 - Nov 2025
Trainee Data Scientist Ahmedabad, Gujarat
 - Designed and executed JSON validation to ensure high-quality, structured POS datasets.
 - Performed data quality checks and anomaly detection to identify inconsistencies in incoming data.
 - Applied validation rules and preprocessing techniques to improve data consistency and overall system reliability.
- **Elite Technocrats**  Jan 2025 - May 2025
Data Analyst Intern Surat, Gujarat
 - Developed sentiment analysis models for text and audio datasets using machine learning techniques.
 - Applied NLP preprocessing and feature extraction for improved classification performance.
 - Performed exploratory data analysis and data cleaning to ensure high-quality model inputs.

EDUCATION

- **Dhirubhai Ambani University (DAU)** July 2023 - May 2025
MSc. Data Science Gandhinagar, Gujarat
- **S.D.Jain International College** June 2020 - Feb 2023
Bachelor in Computer Application (BCA) Surat, Gujarat

PROJECTS

- **Chest Cancer Image Classification using Deep Learning**
Tools: Python, TensorFlow, Keras, NumPy, Scikit-learn, FastAPI, Docker, Streamlit, AWS
 - Developed a ResNet50-based deep learning model to classify chest cancer into 4 categories; achieved 70% accuracy.
 - Improved minority class prediction using class weighting & focal loss, evaluated with precision 0.75, recall 0.66, F1-score 0.64 (macro avg).
 - Built an end-to-end pipeline + Streamlit app for real-time image prediction; handled class imbalance and data augmentation for robust performance.
- **Customer Churn Prediction**
Tools: Python, Apache Spark, Machine Learning
 - Processed large-scale datasets using Apache Spark.
 - Performed feature engineering and built Logistic Regression model for churn prediction.
 - Evaluated performance using accuracy, precision, and recall metrics.
 - Generated actionable insights to support customer retention strategies.
- **Energy Demand Forecasting using ARIMA**
Tools: Python, scikit-learn, Statsmodels
 - Conducted time-series analysis using ARIMA model.
 - Performed stationarity testing using ADF test and tuned (p,d,q) parameters.
 - Evaluated forecasting performance using RMSE metric.

CERTIFICATIONS

- **Python 101 for Data Science** July 2024
- **SQL & Relational Databases 101** July 2024
- **SQL for Data Science** July 2024
